CORVAIR PARTS: AS IMPORTANT TO US AS THEY ARE TO YOU

When you own a distinctive automobile like the Corvair, parts and accessories are important. You can't keep your car running without them.

And because they're important to you, they're important to us.

Matthews Chevrolet still maintains an extensive inventory of Corvair Parts and accessories, and our service department continues to service all models of Corvairs with tender loving care.

No matter what model Corvair you own, it's as important to us as it is to you. Honestly!

A WORD FROM OUR NEW PREZ.....

This is my first opportunity to write to you as President of TCA. As Vice President last year, it was my duty to serve in Pat Bender's absence--which only happened twice. I'm looking forward to serving you full time in 1979!

Here are some random thoughts I'd like to share with you.....

1. Once a month, we're having Board meetings consisting of the present officers as well as the past officers who have served so well. This will strengthen our club on a continuing basis.

2. Club events on Saturdays have been reserved for longer all day trips. Participants have had a great time, but our problem has been attendance--6 cars at most. Conversely, 37 cars turned up at our recent tune-up clinic, and our meeting at the Spaghetti Company had 70 people. This is your club...what is your pleasure?

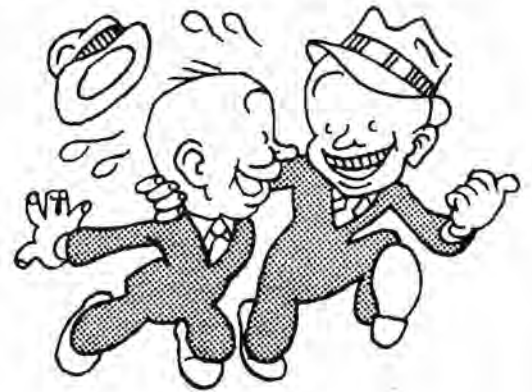

3. A super job has been done by Eric Bender getting all your license plate numbers in the lot each month for the drawing, and selling raffle tickets at the break in the meeting. Thanks, Eric, for volunteering to assist again this year in our grab bag drawing at each meeting.

4. The Park Mall Car show put together by Joel Gemberling was a real standout. How about ElCon in the Fall?

5. Thanks to Don Bortle and Georgia Lewis for being willing to accept the office of Treasurer and Secretary another year.

--Bryan Lynch

TO ALL TCA MEMBERS:

CORVAIRSATION is your newsletter. The editors want to print articles, info and tips that you want to hear about.

Do you have a Corvair problem you'd like some help in solving? Send your question, tech tip, article or info about a fellow club member, a parts vendor, or a recommended service to John North or Gordon Cauble for inclusion in the next issue of CORVAIRSATION. We want to share your ideas with other club members!

TUCSON CORVAIR ASSOCIATION

Regular Meeting - March 28, 1979

Meeting was called to order Wednesday, March 28, 1979, at 8:00 p.m. at Village Inn Pizza, 5133 East 22nd St. Present: 52. Pat Bender reported there were 23 Corvairs in the parking lot (later count 24).

Frank McKenna reported that the Tune-up Clinic was a success and that cars were in better condition than they were at the previous clinic. Next Clinic will be in the fall.

Don Chastain, Can Chairman, reported a collection of \$43.72 during the previous month.

Don Bortle reported \$611.29 in the Treasury. Large increase was due to \$105.00 acquired by Barney Goodwin's contribution of scrap from his garage and membership dues. Barney was applauded for his generosity. Increased Treasury will help in acquiring T-shirts and license plate frames.

Pat Bender announced that the latest issue of national CORSA Communique had a full page picture of Bryon Lynch.

April's mid-month activity will be an economy run to Picacho Peaks on Sunday, April 22nd. Details to be in Corvairsation.

New member Arnold Oggier announced that he would be returning to Indiana, where he has a complete machine shop (The Oggiers will return in the fall). He said he would be happy to do work for any member labor free, if the member would pay for freight and parts.

Intermission, raffle and door prize followed (donor Jay's Da-Nite Auto Supply).

Pat Bender announced the names of nominees which appeared in Corvairsation:

President Bryon Lynch, Vice President Pat Hayhurst, Secretary-Treasurer Don Bortle and Recording Secretary Georgia Lewis. There being no additional names of nominees from the floor, it was moved, seconded and passed that the slate be elected. Louis Lage moved that the Minutes state that the slate was elected by acclamation. It was seconded and passed.

Bryon Lynch then presided.

It was agreed by members present that we continue to meet at Village Inn Pizza. Pat Bender reported, for those who may not have noticed, that "Welcome Tucson Corvair Association" appeared on the marquee out front.

Technical Tip by John North: Have only qualified people who know and understand Corvairs work on your car. If you don't know what you're doing, leave the job alone.

Meeting adjourned at 9:30 pm.

Respectfully submitted,

Georgia Lewis

Georgia Lewis
Recording Secretary

TECH TIPS-

CLEANING ALUMINUM PARTS

For the aluminum parts that can't be cleaned to their original bright sheen with solvent, lacquer thinner, gasoline, alcohol or Gunk, try conventional paint remover. Brush on a medium coating as if you were refinishing furniture. Wait, and then wipe to find that the part finally looks just as it did when new. The remover takes away all the film. Since the film probably was in the varnish family, it's not surprising that the simpler solvents don't cut it.

--Fred Johnson in TRANSAXLE
TELEGRAPH, North Texas
Corvaair Assn.

CHROME TRIM TIP

The 1965 chrome trim on the rocker panel, part no. 3870747, has been discontinued by Chevrolet, but the 1969 Camaro trip piece, part no. 3904540 is an almost exact duplicate of the Corvaair part. It is the same shape and length but is slightly thinner in cross section. It should be available from your local Chevrolet parts house.

--CORVAIR HOUSTON reprinted
from San Diego Club

FUEL PUMP JAM NUT TIP NO. 10-3-78

Make it a habit to periodically check this nut for tightness, unless it is tight the set screw may become loose which will allow the fuel pump to move away from the force of the pump push rod. If this happens, the engine will die from lack of fuel. I prefer to install an inside star washer under the jam nut to provide a more reliable installation.

R.H. (Dick) Brown. S.D.C.C. 561-5439

"POINTS" TO REMEMBER

When changing your distributor points, be careful when reinstalling the wire from the coil back on to the "Quick Disconnect Terminal" on the points (See Figures 1 & 2 below). The lug on the end of the coil wire has extra long prongs which, when pushed all the way down, can touch (ground out to) the contact plate, which can make your engine miss intermittently or worse--cause your engine to stop dead! To play it safe, cut off about 1/16 inch from each prong, as shown in Figure 2.
